# ▲ Important Notice

# **Warning Regarding Counterfeit Products**

Thank you for your continued support of our products.

We have confirmed the circulation of counterfeit versions of our products in the market. While these items may resemble our genuine products in appearance, they are illegal and unauthorized, and may pose serious risks in terms of quality, safety, and performance.

## ■ Counterfeit production and sales are illegal

The manufacturing, distribution, and import/export of counterfeit goods constitute serious violations of laws such as the Trademark Act, Unfair Competition Prevention Act, Customs act and Copyright Law.

We take such infringements very seriously and are working with authorities in Japan and abroad to pursue legal action where appropriate.

## ■ Risks of using counterfeit products

Counterfeit products are not designed or manufactured by us and often fail to meet key safety standards and legal regulations.

They may cause fire, equipment failure, or communication issues, potentially compromising user safety and business continuity.

## ■ Beware of unusually low prices

Products sold at significantly lower prices than normal may be counterfeit. To ensure authenticity and safety, please purchase only through our authorized distributors or certified channels.

## ■ Our policy

We do not tolerate counterfeit activities under any circumstances.

We will continue to take firm action to protect our products and customers.

#### ■ Report counterfeit activity

If you suspect counterfeit products or unauthorized sales, please contact our sales office in your region.

Using genuine products ensures maximum safety and performance.

Thank you for your trust and continued support.
